Sodium carbonate for industrial use — Determination of matter insoluble in water at 50 °C*Carbonate de sodium à usage industriel — Détermination de l'insoluble dans l'eau à 50 °C*

First edition — 1976-02-01

UDC 661.833.622 : 543.721

Ref. No. ISO 746-1976 (E)

Descriptors : sodium carbonate, chemical analysis, determination of content, insoluble matter.

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

Prior to 1972, the results of the work of the Technical Committees were published as ISO Recommendations; these documents are now in the process of being transformed into International Standards. As part of this process, Technical Committee ISO/TC 47 has reviewed ISO Recommendation R 746 and found it technically suitable for transformation. International Standard ISO 746 therefore replaces ISO Recommendation R 746-1968 to which it is technically identical.

ISO Recommendation R 746 was approved by the Member Bodies of the following countries :

Austria	India	South Africa, Rep. of
Belgium	Italy	Spain
Brazil	Japan	Switzerland
Chile	Korea, Rep. of	Turkey
Czechoslovakia	Netherlands	United Kingdom
Egypt, Arab Rep. of	New Zealand	U.S.A.
France	Poland	U.S.S.R.
Germany	Portugal	Yugoslavia
Hungary	Romania	

No Member Body expressed disapproval of the Recommendation.

No Member Body disapproved the transformation of ISO/R 746 into an International Standard.
