**Sulphuric acid and oleums for industrial use —
Determination of oxides of nitrogen — 2,4-xylenol
spectrophotometric method**

First edition — 1972-11-15

UDC 661.25 : 546.173/.175 : 543.422

Ref. No. ISO 2363-1972 (E)

Descriptors : sulphuric acid, chemical analysis, determination of content, spectrophotometry, nitrogen, nitrogen oxides.

Price based on 4 pages

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 2363 was drawn up by Technical Committee ISO/TC 47, *Chemistry*.

It was approved in November 1971 by the Member Bodies of the following countries :

Austria	India	Romania
Belgium	Ireland	South Africa, Rep. of
Chile	Israel	Switzerland
Czechoslovakia	Italy	Thailand
Egypt, Arab Rep. of	Korea, Dem.P.Rep. of	United Kingdom
France	Netherlands	U.S.S.R.
Germany	New Zealand	Yugoslavia
Hungary	Poland	

No Member Body expressed disapproval of the document.
