Phosphoric acid for industrial use — Determination of higher soluble sulfate contents — Titrimetric method after reduction

Acide phosphorique à usage industriel — Dosage des sulfates solubles à teneur élevée — Méthode titrimétrique après réduction

First edition — 1983-10-15

UDC 661.634 : 543.24 : 546.226

Ref. No. ISO 7058-1983 (E)

Descriptors : industrial products, phosphorus inorganic compounds, phosphoric acid, chemical analysis, determination of content, soluble matter, sulfates, volumetric analysis.

Price based on 4 pages

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been authorized has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 7058 was developed by Technical Committee ISO/TC 47, *Chemistry*, and was circulated to the member bodies in May 1982.

It has been approved by the member bodies of the following countries :

Austria	Hungary	Poland
Belgium	India	Portugal
China	Italy	Romania
Czechoslovakia	Korea, Dem. P. Rep. of	South Africa, Rep. of
Egypt, Arab Rep. of	Korea, Rep. of	Spain
France	Mexico	Thailand
Germany, F. R.	Netherlands	USSR

The member body of the following country expressed disapproval of the document on technical grounds :

Australia
