Ref. No. ISO 654-1980 (E)

**Descriptors :** glassware, laboratory glassware, temperature measuring instruments, thermometers, dimensions, designation, graduation, specifications, precision, marking.

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 654 was developed by Technical Committee ISO/TC 48, *Laboratory glassware and related apparatus*, and was circulated to the member bodies in September 1979.

It has been approved by the member bodies of the following countries :

Australia	India	Romania
Brazil	Italy	South Africa, Rep. of
Canada	Korea, Rep. of	Spain
Czechoslovakia	Libyan Arab Jamahiriya	United Kingdom
France	Mexico	USSR
Germany, F.R.	Netherlands	
Hungary	Portugal	

No member body expressed disapproval of the document.

This International Standard cancels and replaces ISO Recommendation R 654-1968, of which it constitutes a technical revision.
