

Methods of test for dense shaped refractory products —

Part 17: Determination of bulk density of granular materials by the mercury method with vacuum

The European Standard EN 993-17:1998 has the status of a
British Standard

ICS 81.080

| |
|-------------------------|
| Confirmed March 2010 |
|-------------------------|

National foreword

This British Standard is the English language version of EN 993-17:1998. It supersedes BS 1902-3.6:1984, which is withdrawn.

The UK participation in its preparation was entrusted by Technical Committee RPI/1, Refractory products and materials, to Subcommittee RPI/1/1, Sampling and physical testing of refractory products, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this subcommittee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the BSI Standards Catalogue under the section entitled “International Standards Correspondence Index”, or by using the “Find” facility of the BSI Standards Electronic Catalogue.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, the EN title page, pages 2 to 7, and a back cover.

This British Standard, having been prepared under the direction of the Sector Committee for Materials and Chemicals, was published under the authority of the Standards Committee and comes into effect on 15 May 1999

ICS

Descriptors: refractory materials, shaped refractories, dense shaped refractory products, tests, determination, measurements, density (mass/volume), bulk density, granular materials, pycnometric analysis, mercury, procedures

English version

Methods of test for dense shaped refractory products —
Part 17: Determination of bulk density of granular materials
by the mercury method with vacuum

Méthodes d'essai pour produits réfractaires
façonnés denses —
Partie 17: Détermination de la masse volumique
apparente des matériaux en grains par la méthode
au mercure sous vide

Prüfverfahren für dichte geformte feuerfeste
Erzeugnisse —
Teil 17: Bestimmung der Rohdichte an körnigem
Gut nach dem Quecksilber-Verdrängungsverfahren
unter Vakuum

This European Standard was approved by CEN on 28 November 1998.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.
