Sodium sulphate for industrial use — Determination of calcium content — Flame atomic absorption spectrometric method

Sulfate de sodium à usage industriel — Dosage du calcium — Méthode par spectrométrie d'absorption atomique dans la flamme

First edition — 1979-09-01

SEP 28 1979

UDC 661.833.53 : 543.422 : 546.41

Ref. ISO 5994-1979 (E)

Descriptors : sodium sulphates, chemical analysis, determination of content, calcium, spectrophotometric analysis, flame photometric analysis, atomic absorption spectroscopic analysis

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 5994 was developed by Technical Committee ISO/TC 47, *Chemistry*, and was circulated to the member bodies in October 1977.

It has been approved by the member bodies of the following countries :

Australia	Germany, F. R.	Philippines
Belgium	Hungary	Poland
Brazil	India	Romania
Bulgaria	Israel	South Africa, Rep. of
Chile	Italy	Switzerland
Czechoslovakia	Kenya	Turkey
Egypt, Arab Rep. of	Korea, Rep. of	United Kingdom
France	Netherlands	USSR

No member body expressed disapproval of the document.

This international Standard has also been approved by the International Union of Pure and Applied Chemistry (IUPAC).
