SH/T 3108—2017
代替SH/T 3108—2000

石油化工全厂性工艺及热力管道设计规范

Specifications for design of interconnecting process and thermal piping in
petrochemical industry

2017-07-07发布

2018-01-01实施

中华人民共和国工业和信息化部 发布

目 次

前言.....III

1 范围.....1

2 规范性引用文件.....1

3 术语和定义.....1

4 工艺管道流程设计.....2

 4.1 一般规定.....2

 4.2 工艺管道的管径及流速.....4

5 热力管道流程设计.....5

 5.1 一般规定.....5

 5.2 蒸汽及凝结水管道.....5

 5.3 氮气及空气管道.....6

 5.4 热力管道的管径及流速.....6

6 工艺及热力管道配管设计.....6

 6.1 一般规定.....6

 6.2 管道的跨度和间距.....8

 6.3 管道的热补偿.....8

附录 A（规范性附录） 防止水击破坏的控制流速的计算.....10

附录 B（规范性附录） 吹扫管道内径的计算.....11

附录 C（规范性附录） 管道最大允许跨度的计算.....12

附录 D（规范性附录） 埋地管道热位移计算.....15

本规范用词说明.....16

附：条文说明.....17

Contents

Foreword III

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Design philosophy of Process piping 2

 4.1 General requirements 2

 4.2 Diameter and flowrate of process piping 4

5 Design philosophy of thermal piping 5

 5.1 General requirements 5

 5.2 Steam and condensate piping 5

 5.3 Nitrogen and air piping 6

 5.4 Diameter and flowrate of thermal piping 6

6 Piping design 6

 6.1 General requirements 6

 6.2 Piping span and spacing 8

 6.3 Flexible design of piping 8

Appendix A (Normative) Allowable flowrate calculation for preventing the damage of surge 10

Appendix B (Normative) Diameter calculation of purge piping 11

Appendix C (Normative) Piping maximum allowable span calculation 12

Appendix D (Normative) Thermal displacement calculation of underground piping 15

Explanation of wording in the specification 16

Appendix: Explanation of article 17
