

March 2023

ICS 65.080

Will supersede CEN/TS 17701-3:2022

English Version

Plant biostimulants - Determination of specific elements - Part 3: Determination of mercury

Biostimulants des végétaux - Dosage des éléments
spécifiques - Partie 3 : Dosage du mercure

Pflanzen-Biostimulanzien - Bestimmung spezifischer
Elemente - Teil 3: Bestimmung von Quecksilber

This draft European Standard is submitted to CEN members for enquiry. It has been drawn up by the Technical Committee CEN/TC 455.

If this draft becomes a European Standard, CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

This draft European Standard was established by CEN in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Türkiye and United Kingdom.

Recipients of this draft are invited to submit, with their comments, notification of any relevant patent rights of which they are aware and to provide supporting documentation.

Warning : This document is not a European Standard. It is distributed for review and comments. It is subject to change without notice and shall not be referred to as a European Standard.

Contents	Page
European foreword	3
Introduction	4
1 Scope	5
2 Normative references	5
3 Terms and definitions	5
4 Principle	5
4.1 Vapour generation atomic absorption spectrophotometry (VG-AAS)	5
4.2 Direct amalgamation (DA)	5
5 Interferences	6
5.1 Vapour generation atomic absorption spectrophotometry (VG-AAS)	6
5.2 Direct amalgamation (DA)	6
6 Reagents	6
7 Apparatus	7
8 Procedure	8
8.1 Preparation of the test and blank solutions	8
8.2 Preparation of the calibration solutions	8
8.3 Measurement	8
8.3.1 Instrument conditions	8
8.3.2 Matrix effects	8
8.3.3 Spiking	9
8.3.4 Measurement by VG-AAS	9
8.3.5 Measurement by DA	9
9 Calculation and expression of the results	10
9.1 Content of mercury	10
10 Test report	10
Annex A (informative) Methods for mercury determination	11
A.1 Cold vapour generation (hydride generation)	11
A.2 Direct amalgamation technique	12
A.3 Inductively coupled plasma mass spectrometry (ICP-MS)	12
Annex B (informative) Results of the inter-laboratory study	13
B.1 Inter-laboratory tests	13
B.2 Statistical results	13
Annex ZA (informative) Relationship of this European Standard and the essential requirements of Regulation (EU) 2019/1009 making available on the market of EU fertilising products aimed to be covered	15

European foreword

This document (prEN 17701-3:2023) has been prepared by Technical Committee CEN/TC 455 “Plant biostimulants”, the secretariat of which is held by AFNOR.

This document is currently submitted to the CEN Enquiry.

This document will supersede CEN/TS 17701-3:2022.

This document has been prepared under a Standardization Request given to CEN by the European Commission and the European Free Trade Association, and supports essential requirements of EU Directive(s) / Regulation(s).

For relationship with EU Directive(s) / Regulation(s), see informative Annex ZA, which is an integral part of this document.

EN 17701 series, *Plant biostimulants — Determination of specific elements*, consists of the following parts:

- *Part 1: Digestion by aqua regia for subsequent determination of elements;*
- *Part 2: Determination of total content of Cd, Pb, Ni, As, Cr, Cu and Zn;*
- *Part 3: Determination of mercury.*
