

## Manganese ores — Determination of barium oxide content — Barium sulphate gravimetric method

*Minerais de manganèse — Dosage de l'oxyde de baryum — Méthode gravimétrique à l'état de sulfate de baryum*

**Second edition — 1981-11-15**

---

**UDC 669.74 : 543.21 : 546.431-31**

**Ref. No. ISO 548-1981 (E)**

**Descriptors :** manganese ores, chemical analysis, determination of content, barium oxides, gravimetric analysis.

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 548 was developed by Technical Committee ISO/TC 65, *Manganese and chromium ores*.

This second edition was submitted directly to the ISO Council, in accordance with clause 5.10.1 of part 1 of the Directives for the technical work of ISO. It cancels and replaces the first edition (i.e. ISO 548-1975), which had been approved by the member bodies of the following countries :

Australia	Hungary	Romania
Austria	India	South Africa, Rep. of
Chile	Iran	Spain
Czechoslovakia	Ireland	United Kingdom
Egypt, Arab Rep. of	Italy	USSR
France	Japan	Yugoslavia
Germany, F. R.	Poland	

No member body had expressed disapproval of the document.
