**Sulphuric acid and oleums for industrial use — Determination
of sulphur dioxide content — Iodometric method**

Acide sulfurique et oléums à usage industriel — Dosage du dioxyde de soufre — Méthode iodométrique

First edition — 1975-11-01

ANSI Internat Doc Sect

NOV 3 - 1975

UDC 661.25 : 546.224 : 543.242.3

Ref. No. ISO 3423-1975 (E)

Descriptors : sulphuric acid, chemical analysis, determination of content, sulphur dioxide, volumetric analysis.

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 3423 was drawn up by Technical Committee ISO/TC 47, *Chemistry*, and circulated to the Member Bodies in February 1974.

It has been approved by the Member Bodies of the following countries :

Austria	India	South Africa, Rep. of
Belgium	Israel	Switzerland
Bulgaria	Italy	Thailand
Chile	Netherlands	Turkey
Egypt, Arab Rep. of	New Zealand	United Kingdom
France	Poland	U.S.S.R.
Germany	Portugal	Yugoslavia
Hungary	Romania	

No Member Body expressed disapproval of the document.
