Ammonium sulphate for industrial use – Determination of ammoniacal nitrogen content – Titrimetric method after distillation

Sulfate d'ammonium à usage industriel - Dosage de l'azote ammoniacal - Méthode titrimétrique après distillation

First edition - 1975-07-15

ANSI Internat Doc Sect

JUL 16 1975

3332

UDC 661.522 : 546.171 : 543.24

Ref. No. ISO 3332-1975 (E)

Descriptors : ammonium sulphate, chemical analysis, determination of content, nitrogen, volumetric analysis.

SO 3332-1975 (E)

Not for Resale

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 3332 was drawn up by Technical Committee ISO/TC 47, *Chemistry*, and circulated to the Member Bodies in March 1974.

It has been approved by the Member Bodies of the following countries :

Austria Belgium Bulgaria Chile Czechoslovakia Egypt, Arab Rep. of France Germany Hungary India Ireland Israel Italy Netherlands New Zealand Poland South Africa, Rep. of Spain Switzerland Thailand Turkey United Kingdom U.S.S.R. Yugoslavia

No Member Body expressed disapproval of the document.
