INTERNATIONAL ORGANIZATION FOR STANDARDIZATION • МЕЖДУНАРОДНАЯ ОРГАНИЗАЦИЯ ПО СТАНДАРТИЗАЦИИ • ORGANISATION INTERNATIONALE DE NORMALISATION

Magnesium and its alloys — Determination of manganese in magnesium alloys containing zirconium, rare earths, thorium and silver — Periodate photometric method

First edition — 1972-08-01

UDC 669.721 : 546.711

Ref. No. ISO 2353-1972 (E)

Descriptors : magnesium alloys, rare earth containing alloys, silver containing alloys, thorium containing alloys, zirconium containing alloys, chemical analysis, determination of content, manganese, photometry

Price based on 3 pages

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 2353 was drawn up by Technical Committee ISO/TC 79, *Light metals and their alloys*.

It was approved in December 1971 by the Member Bodies of the following countries :

Austria	Hungary	South Africa, Rep. of
Belgium	India	Spain
Canada	Ireland	Sweden
Czechoslovakia	Israel	Switzerland
Egypt, Arab Rep. of	Italy	Thailand
Finland	Netherlands	United Kingdom
France	Norway	U.S.A.
Germany	Romania	U.S.S.R.

No Member Body expressed disapproval of the document.
