Metallic materials — Sheet and strip 3 mm thick or less — Reverse bend test

Matériaux métalliques — Tôles et feuillards d'épaisseur inférieure ou égale à 3 mm — Essai de pliage alterné

First edition — 1985-10-01

UDC 669-415 : 620.177.6

Ref. No. ISO 7799-1985 (E)

Descriptors : metals, sheet metal, strips, tests, mechanical tests, reverse bend tests, test equipment.

ISO 7799-1985 (E)

Price based on 3 pages

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council. They are approved in accordance with ISO procedures requiring at least 75 % approval by the member bodies voting.

International Standard ISO 7799 was prepared by Technical Committee ISO/TC 164, *Mechanical testing of metals*.

It cancels and replaces ISO Recommendation R 88-1959, of which it constitutes a technical revision.
