## **Information processing systems — Computer system configuration diagram symbols and conventions**

*Systèmes de traitement de l'information — Symboles et conventions s'appliquant aux  
schémas des configurations de systèmes informatiques*

Reference number  
ISO 8790:1987 (E)

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council. They are approved in accordance with ISO procedures requiring at least 75 % approval by the member bodies voting.

International Standard ISO 8790 was prepared by Technical Committee ISO/TC 97, *Information processing systems*.

Users should note that all International Standards undergo revision from time to time and that any reference made herein to any other International Standard implies its latest edition, unless otherwise stated.

<b>Contents</b>	<b>Page</b>
<b>1</b> Scope .....	<b>1</b>
<b>2</b> Field of application .....	<b>1</b>
<b>3</b> Configuration diagram symbols .....	<b>1</b>
<b>3.1</b> Physical unit or its enclosure .....	<b>1</b>
<b>3.2</b> Connection line .....	<b>5</b>
<b>4</b> Conventions .....	<b>6</b>
<b>4.1</b> Symbol shape .....	<b>6</b>
<b>4.2</b> Connection lines .....	<b>6</b>
<b>4.3</b> Identification of symbols .....	<b>9</b>
<b>4.4</b> Representation of multiple units in a single enclosure .....	<b>9</b>
<b>4.5</b> Proper use of symbols .....	<b>10</b>
<b>4.6</b> Representation of a selection unit .....	<b>10</b>
<b>4.7</b> Representation of future installations .....	<b>10</b>
<b>4.8</b> Repetitive representation of the same units .....	<b>11</b>
<b>4.9</b> Overlaid representation of different units .....	<b>11</b>
<b>4.10</b> Representation of omission .....	<b>11</b>
<b>5</b> Consolidated table of symbols .....	<b>12</b>
