Protective gloves against mechanical risks

National foreword

This British Standard is the UK implementation of EN 388:2016+A1:2018. It supersedes BS EN 388:2016, which is withdrawn.

BSI, as a member of CEN, is obliged to publish EN 388:2016 as a British Standard. However, attention is drawn to the fact that during the development of this European Standard, the UK committee voted against its approval as a European Standard.

National Annex NA (informative) details the UK committee concerns and gives guidance on cut resistance product markings in relation to mechanical risk gloves.

The UK participation in its preparation was entrusted to Technical Committee PH/3/8, Protective gloves.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.
