Paints and varnishes

Corrosion protection of steel structures by protective paint systems

Part 4: Types of surface and surface preparation

F : Peintures et vernis — Anticorrosion des structures en acier par systèmes de peinture — Partie 4 : Types de surface et préparation de surface

D : Beschichtungsstoffe — Korrosionsschutz von Stahlbauten durch Beschichtungssysteme — Teil 4: Arten von Oberflächen und Oberflächenvorbereitung

French standard approved

by decision of the Director General of AFNOR on August 20, 1998 taking effect on September 20, 1998.

Correspondence

The European standard EN ISO 12944-4:1998 has the status of French standard. It reproduces in full the international standard ISO 12944-4:1998.

Analysis

This document describes different types of surfaces to protect and provides information concerning the surface preparation and pretreatment methods, such as chemical cleaning, power tool cleaning and flame cleaning, as well as information concerning the aspects relating to health, safety and environment. It deals with the degree of preparation of substrates, surface profile (roughness), evaluation of prepared surface, temporary protection of prepared substrates, preparation of temporarily protected surface for the application of other coatings, preparation of existing metal coatings and environmental aspects.

Descriptors

Technical International Thesaurus: paints, varnishes, steel construction, corrosion, corrosion prevention, protective coatings, surface condition, surface treatment.
