

**EUROPEAN STANDARD**  
**NORME EUROPÉENNE**  
**EUROPÄISCHE NORM**

**EN 1993-1-8**  
May 2005  
**+ AC**  
July 2009

ICS 91.010.30; 91.080.10

Supersedes ENV 1993-1-1:1992

English version

**Eurocode 3: Design of steel structures —  
Part 1-8: Design of joints**

Eurocode 3: Calcul des structures en acier — Partie 1-8:  
Calcul des assemblages

Eurocode 3: Bemessung und Konstruktion von  
Stahlbauten — Teil 1-8: Bemessung von Anschlüssen

EN 1993-1-8:2005 was approved by CEN on 2004-04-16 and Amendment AC:2009 on 2009-07-29.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Management Centre or to any CEN member.

The European Standards exist in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

	Page
<b>Foreword .....</b>	<b>5</b>
<b>1    Introduction .....</b>	<b>8</b>
1.1    Scope .....	8
1.2    Normative references.....	8
1.3    Distinction between Principles and Application Rules .....	10
1.4    Terms and definitions .....	10
1.5    Symbols .....	13
<b>2    Basis of design.....</b>	<b>18</b>
2.1    Assumptions .....	18
2.2    General requirements.....	18
2.3    Applied forces and moments .....	18
2.4    Resistance of joints.....	18
2.5    Design assumptions .....	19
2.6    Joints loaded in shear subject to impact, vibration and/or load reversal .....	19
2.7    Eccentricity at intersections.....	19
<b>3    Connections made with bolts, rivets or pins.....</b>	<b>20</b>
3.1    Bolts, nuts and washers .....	20
3.1.1    General .....	20
3.1.2    Preloaded bolts .....	20
3.2    Rivets.....	20
3.3    Anchor bolts .....	21
3.4    Categories of bolted connections.....	21
3.4.1    Shear connections.....	21
3.4.2    Tension connections .....	21
3.5    Positioning of holes for bolts and rivets .....	23
3.6    Design resistance of individual fasteners .....	24
3.6.1    Bolts and rivets .....	24
3.6.2    Injection bolts .....	28
3.7    Group of fasteners .....	29
3.8    Long joints.....	29
3.9    Slip-resistant connections using 8.8 or 10.9 bolts .....	30
3.9.1    Design Slip resistance.....	30
3.9.2    Combined tension and shear.....	31
3.9.3    Hybrid connections.....	31
3.10    Deductions for fastener holes .....	31
3.10.1    General .....	31
3.10.2    Design for block tearing .....	32
3.10.3    Angles connected by one leg and other unsymmetrically connected members in tension.....	33
3.10.4    Lug angles .....	34
3.11    Prying forces.....	34
3.12    Distribution of forces between fasteners at the ultimate limit state.....	34
3.13    Connections made with pins.....	35
3.13.1    General .....	35
3.13.2    Design of pins.....	35
<b>4    Welded connections .....</b>	<b>38</b>
4.1    General .....	38
4.2    Welding consumables.....	38
4.3    Geometry and dimensions .....	38
4.3.1    Type of weld .....	38
4.3.2    Fillet welds .....	38

4.3.3	Fillet welds all round .....	40
4.3.4	Butt welds .....	40
4.3.5	Plug welds .....	41
4.3.6	Flare groove welds .....	41
4.4	Welds with packings .....	41
4.5	Design resistance of a fillet weld .....	42
4.5.1	Length of welds .....	42
4.5.2	Effective throat thickness .....	42
4.5.3	Design Resistance of fillet welds .....	42
4.6	Design resistance of fillet welds all round .....	44
4.7	Design resistance of butt welds .....	45
4.7.1	Full penetration butt welds .....	45
4.7.2	Partial penetration butt welds .....	45
4.7.3	T-butt joints .....	45
4.8	Design resistance of plug welds .....	45
4.9	Distribution of forces .....	46
4.10	Connections to unstiffened flanges .....	46
4.11	Long joints .....	48
4.12	Eccentrically loaded single fillet or single-sided partial penetration butt welds .....	48
4.13	Angles connected by one leg .....	48
4.14	Welding in cold-formed zones .....	49
<b>5</b>	<b>Analysis, classification and modelling .....</b>	<b>50</b>
5.1	Global analysis .....	50
5.1.1	General .....	50
5.1.2	Elastic global analysis .....	50
5.1.3	Rigid-plastic global analysis .....	51
5.1.4	Elastic-plastic global analysis .....	51
5.1.5	Global analysis of lattice girders .....	52
5.2	Classification of joints .....	54
5.2.1	General .....	54
5.2.2	Classification by stiffness .....	54
5.2.3	Classification by strength .....	55
5.3	Modelling of beam-to-column joints .....	56
<b>6</b>	<b>Structural joints connecting H or I sections .....</b>	<b>60</b>
6.1	General .....	60
6.1.1	Basis .....	60
6.1.2	Structural properties .....	60
6.1.3	Basic components of a joint .....	61
6.2	Design Resistance .....	65
6.2.1	Internal forces .....	65
6.2.2	Shear forces .....	65
6.2.3	Bending moments .....	66
6.2.4	Equivalent T-stub in tension .....	67
6.2.5	Equivalent T-stub in compression .....	70
6.2.6	Design Resistance of basic components .....	71
6.2.7	Design moment resistance of beam-to-column joints and splices .....	84
6.2.8	Design resistance of column bases with base plates .....	89
6.3	Rotational stiffness .....	92
6.3.1	Basic model .....	92
6.3.2	Stiffness coefficients for basic joint components .....	94
6.3.3	End-plate joints with two or more bolt-rows in tension .....	97
6.3.4	Column bases .....	98
6.4	Rotation capacity .....	99
6.4.1	General .....	99
6.4.2	Bolted joints .....	100
