

Water quality — Determination of selected organotin compounds — Gas chromatographic method

The European Standard EN ISO 17353:2004 has the status of a British Standard

ICS 13.060.50

Confirmed July 2008

National foreword

This British Standard is the official English language version of EN ISO 17353:2005. It is identical with ISO 17353:2004.

The UK participation in its preparation was entrusted by Technical Committee EH/3, Water quality, to Subcommittee EH/3/2, Physical, chemical and biochemical methods, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this subcommittee can be obtained on request to its secretary.

Additional information

The responsible BSI committee would like to draw attention to the following. This international standard is applicable to waters containing a maximum of 2 g/l of suspended material. However, the application of this standard to samples containing amounts smaller than 2 g/l of suspended material can affect recovery during the alkylation and extraction stages. This is due to the adsorption of the suspended material onto the solid material. Once the performance of this standard has been verified, samples containing suspended material can be analysed.

Cross-references

The British Standards which implement international publications referred to in this document may be found in the *BSI Catalogue* under the section entitled “International Standards Correspondence Index”, or by using the “Search” facility of the *BSI Electronic Catalogue* or of British Standards Online.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, the EN ISO title page, the EN ISO foreword page, the ISO title page, pages ii to v, a blank page, pages 1 to 31 and a back cover.

The BSI copyright notice displayed in this document indicates when the document was last issued.

English Version

Water quality - Determination of selected organotin compounds - Gas chromatographic method (ISO 17353:2004)

Qualité de l'eau - Dosage de composés organostanniques
sélectionnés - Méthode par chromatographie en phase
gazeuse (ISO 17353:2004)

Wasserbeschaffenheit - Bestimmung von ausgewählten
Organozinnverbindungen - Verfahren mittels
Gaschromatographie (ISO 17353:2004)

This European Standard was approved by CEN on 18 July 2005.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.
