Butan-1-ol for industrial use — Methods of test — Part 1 : General

Butanol-1 à usage industriel — Méthodes d'essai — Partie 1 : Généralités

First edition — 1981-09-01

UDC 661.725.4 : 543.620.1

Ref. No. ISO 755/1-1981 (E)

Descriptors : industrial products, chemical compounds, butanes, tests, instructions.

Price based on 3 pages

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 755/1 was developed by Technical Committee ISO/TC 47, *Chemistry*, and was circulated to the member bodies in February 1980.

It has been approved by the member bodies of the following countries :

Australia	France	Philippines
Austria	Germany, F. R.	Romania
Belgium	Hungary	South Africa, Rep. of
Brazil	India	Switzerland
Bulgaria	Italy	Thailand
China	Korea, Rep. of	United Kingdom
Czechoslovakia	Mexico	USSR
Egypt, Arab Rep. of	Netherlands	

The member body of the following country expressed disapproval of the document on technical grounds :

Poland

International Standards ISO 755/1, ISO 755/2 and ISO 755/3 cancel and replace ISO Recommendation R 755-1968, of which they constitute a technical revision.

This International Standard has also been approved by the International Union of Pure and Applied Chemistry (IUPAC).
