Hydrochloric acid for industrial use — Determination of oxidizing or reducing substances content — Titrimetric method

Acide chlorhydrique à usage industriel — Dosage des matières oxydantes ou des matières réductrices — Méthode titrimétrique

First edition — 1980-03-01

UDC 661.419 : 543.242

Ref. No. ISO 908-1980 (E)

Descriptors : chemical compounds, hydrochloric acid, chemical analysis, determination of content, chlorine, sulphur dioxide, volumetric analysis.

Price based on 3 pages

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 908 was developed by Technical Committee ISO/TC 47, *Chemistry*.

It was submitted directly to the ISO Council, in accordance with clause 5.10.1 of part 1 of the Directives for the technical work of ISO. It cancels and replaces ISO Recommendation R 908-1968, which had been approved by the member bodies of the following countries :

Austria	India	Portugal
Belgium	Iran	Romania
Bulgaria	Ireland	South Africa, Rep. of
Chile	Israel	Spain
Cuba	Italy	Switzerland
Czechoslovakia	Japan	Thailand
Egypt, Arab Rep. of	Korea, Dem. P. Rep. of	Turkey
France	Netherlands	United Kingdom
Germany, F. R.	New Zealand	USSR
Hungary	Poland	Yugoslavia

No member body had expressed disapproval of the document.
