Higher alcohols for industrial use — Methods of test — Part 8 : Sulphuric acid colour test

Alcools supérieurs à usage industriel — Méthodes d'essai — Partie 8 : Essai de coloration à l'acide sulfurique

First edition — 1982-06-15

UDC 661.725.6 : 543.41

Ref. No. ISO 1843/8-1982 (E)

Descriptors : alcohols, tests, sulphuric acid, colorimetric analysis.

Price based on 2 pages

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 1843/8 was developed by Technical Committee ISO/TC 47, *Chemistry*, and was circulated to the member bodies in December 1980.

It has been approved by the member bodies of the following countries :

Australia	India	Portugal
Austria	Ireland	Romania
Belgium	Italy	South Africa, Rep. of
China	Korea, Dem. P. Rep. of	Switzerland
Czechoslovakia	Korea, Rep. of	Thailand
Egypt, Arab Rep. of	Mexico	United Kingdom
France	New Zealand	USSR
Germany, F. R.	Philippines	
Hungary	Poland	

The member body of the following country expressed disapproval of the document on technical grounds :

Netherlands

This International Standard has also been approved by the International Union of Pure and Applied Chemistry (IUPAC).

This International Standard cancels and replaces ISO Recommendation R 1852-1970, of which it constitutes a technical revision.
