FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

Prior to 1972, the results of the work of the Technical Committees were published as ISO Recommendations; these documents are now in the process of being transformed into International Standards. As part of this process, Technical Committee ISO/TC 47 has reviewed ISO Recommendation R 2051 and found it technically suitable for transformation. International Standard ISO 2051 therefore replaces ISO Recommendation R 2051-1971 to which it is technically identical.

ISO Recommendation R 2051 was approved by the Member Bodies of the following countries :

Austria	Hungary	Poland
Belgium	India	South Africa, Rep. of
Chile	Iran	Spain
Czechoslovakia	Israel	Switzerland
Egypt, Arab Rep. of	Italy	Thailand
France	Korea, Rep. of	United Kingdom
Germany	Netherlands	U.S.A.
Greece	New Zealand	U.S.S.R.

The Member Body of the following country expressed disapproval of the Recommendation on technical grounds :

Portugal*

* Subsequently, this Member Body approved the Recommendation.

No Member Body disapproved the transformation of ISO/R 2051 into an International Standard.
