**Sodium hydrogen carbonate for industrial use —
Determination of sodium carbonate — Titrimetric method**

First edition — 1972-08-01

UDC 661.321.8 : 546.33'264 : 543.24

Ref. No. ISO 2198-1972 (E)

Descriptors : sodium carbonates, chemical analysis, determination of content, volumetric analysis.

Price based on 2 pages

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 2198 was drawn up by Technical Committee ISO/TC 47, *Chemistry*.

It was approved in May 1971 by the Member Bodies of the following countries:

Austria	Netherlands	Switzerland
Belgium	New Zealand	Turkey
Egypt, Arab Rep. of	Poland	United Kingdom
Germany	Portugal	U.S.A.
Hungary	Romania	U.S.S.R.
Israel	South Africa, Rep. of	
Italy	Spain	

The Member Bodies of the following countries expressed disapproval of the document on technical grounds:

France
India
