**Crude sodium borates for industrial use – Determination of total titanium content – Photometric method***Borates de sodium bruts à usage industriel – Dosage du titane total – Méthode photométrique*

First edition – 1975-03-01

UDC 661 : 652 : 546.821 : 543.42

Ref. No. ISO 2761-1975 (E)

Descriptors : sodium borates, chemical analysis, determination of content, titanium, photometric analysis.

Price based on 2 pages

## FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 2761 was drawn up by Technical Committee ISO/TC 47, *Chemistry*, and circulated to the Member Bodies in May 1972.

It has been approved by the Member Bodies of the following countries :

Austria	Ireland	Romania
Belgium	Israel	South Africa, Rep. of
Czechoslovakia	Italy	Switzerland
France	Netherlands	Turkey
Germany	New Zealand	United Kingdom
Hungary	Poland	U.S.A.
India	Portugal	U.S.S.R.

No Member Body expressed disapproval of the document.
