Sodium sulphate for industrial use — Determination of chlorides content — Mercurimetric method*Sulfate de sodium à usage industriel — Dosage des chlorures — Méthode mercurimétrique*

First edition — 1975-07-15

UDC 661.833.53 : 546.132 : 543.24

Ref. No. ISO 3236-1975 (E)

Descriptors: sodium sulphates, chemical analysis, determination of content, chlorides, mercurimetric analysis.

Price based on 4 pages

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 3236 was drawn up by Technical Committee ISO/TC 47, *Chemistry*, and circulated to the Member Bodies in November 1973.

It has been approved by the Member Bodies of the following countries :

Australia	Germany	Poland
Austria	Hungary	South Africa, Rep. of
Belgium	India	Spain
Bulgaria	Ireland	Switzerland
Chile	Israel	Thailand
Czechoslovakia	Italy	Turkey
Egypt, Arab Rep. of	Korea, Rep. of	United Kingdom
Finland	Netherlands	U.S.S.R.
France	New Zealand	

No Member Body expressed disapproval of the document.
