FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 3694 was developed by Technical Committee ISO/TC 47, *Chemistry*, and was circulated to the member bodies in December 1974.

It has been approved by the member bodies of the following countries :

Austria	Hungary	Spain
Belgium	India	Switzerland
Brazil	Ireland	Turkey
Bulgaria	Israel	United Kingdom
Chile	Italy	U.S.S.R.
Czechoslovakia	Netherlands	Yugoslavia
France	Poland	
Germany	South Africa, Rep. of	

No member body expressed disapproval of the document.
