Hardmetals — Rockwell hardness test (scale A) — Part 1 : Test method

Métaux-durs - Essai de dureté Rockwell (échelle A) - Partie 1 : Méthode d'essai

First edition - 1982-10-15

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 3738/1 was developed by Technical Committee ISO/TC 119, *Powder metallurgy*, and was circulated to the member bodies in February 1982.

It has been approved by the member bodies of the following countries:

Brazil Bulgaria China Ireland Italy Spain Sweden Switzerland

USA

USSR

Czechoslovakia Egypt, Arab Rep. of Mexico Poland

Korea, Rep. of

Romania

Germany, F. R.

France

South Africa, Rep. of

The member body of the following country expressed disapproval of the document on technical grounds :

United Kingdom

This International Standard cancels and replaces International Standard ISO 3738-1976 of which it constitutes a technical revision.
