Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 3.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this part of ISO 3822 may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

International Standard ISO 3822-1 was prepared by the European Committee for Standardization (CEN) in collaboration with ISO Technical Committee TC 43, *Acoustics*, Subcommittee SC 2, *Building acoustics*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

Throughout the text of this standard, read "...this European Standard..." to mean "...this International Standard...".

This third edition cancels and replaces the second edition (ISO 3822-1:1983), which has been technically revised.

ISO 3822 consists of the following parts, under the general title *Acoustics — Laboratory tests on noise emission from appliances and equipment used in water supply installations*:

- Part 1: *Method of measurement*
- Part 2: *Mounting and operating conditions for draw-off taps and mixing valves*
- Part 3: *Mounting and operating conditions for in-line valves and appliances*
- Part 4: *Mounting and operating conditions for special appliances*

Annex C forms a normative part of this part of ISO 3822. Annexes A and B are for information only.

Foreword.....	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Definitions	1
4 Principle.....	3
5 Test arrangement (see figure 1)	3
5.1 Test room.....	3
5.2 Correction for background noise.....	4
5.3 Test wall.....	4
5.4 Test pipe	4
5.5 Connection of appliances	6
5.6 Water supply system.....	6
5.7 Stabilising and checking the test arrangement.....	6
5.8 Measurement of intrinsic noise of installation arrangement	8
6 Test equipment	9
6.1 Sound level meter and filters.....	9
6.2 Hydraulic measuring instruments.....	9
7 Installation noise standard	9
8 Test procedure.....	12
8.1 General.....	12
8.2 Determination of appliance sound pressure level L_{ap}	12
9 Expression of results	13
10 Test report	13
Annex A (informative) Procedure for venting the piping system (test pipe and twin outlet etc.).....	14
Annex B (informative) Alternative procedures for measurements for computer-aided test facilities	16
Annex C (normative) Selection of samples.....	17
