## Fasteners — Electroplated coatings

*Éléments de fixation — Revêtements électrolytiques*

Reference number  
ISO 4042:1999(E)

<b>Contents</b>	<b>Page</b>
1 Scope .....	1
2 Normative references .....	1
3 Terms and definitions .....	2
4 Dimensional requirements and gauging .....	3
4.1 Dimensional requirements before electroplating .....	3
4.2 Dimensional requirements after electroplating .....	3
5 Other coating requirements .....	3
6 Hydrogen embrittlement relief .....	3
7 Corrosion protection .....	4
8 Applicability to fasteners that cut or form their own mating threads .....	4
9 Specification of coating thickness .....	4
10 Measurement of coating thickness .....	5
10.1 Local thickness .....	5
10.2 Batch average thickness .....	7
10.3 Agreement on test method .....	7
11 Sampling for thickness tests .....	7
12 Ordering requirements for electroplating .....	7
13 Designation .....	7
Annex A (informative) Hydrogen embrittlement relief .....	8
Annex B (informative) Salt spray corrosion protection performance of metallic coatings .....	10
Annex C (informative) Guidance on procedures that may be adopted to accommodate thick coatings .....	12
Annex D (normative) Determination of batch average thickness .....	13
Annex E (normative) Designation code, system A, for electroplated coatings on threaded parts .....	16
Annex F (informative) Examples for coating designation .....	19
Annex G (informative) Surface areas of bolts, screws and nuts .....	20
Bibliography .....	23

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 3.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 4042 was prepared by Technical Committee ISO/TC 2, *Fasteners*, Subcommittee SC1, *Mechanical properties of fasteners*.

This second edition cancels and replaces the first edition (ISO 4042:1989) which has been technically revised.

Annexes D and E form a normative part of this International Standard. Annexes A, B, C, F and G are for information only.
