Ref. No. ISO 5194-1981 (E)

## **Foreword**

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 5194 was developed by Technical Committee ISO/TC 79, Light metals and their alloys, and was circulated to the member bodies in December 1980.

It has been approved by the member bodies of the following countries:

Hungary South Africa, Rep. of Australia Austria India Spain Sweden Brazil Italy Canada Japan Switzerland China Korea, Rep. of United Kingdom Czechoslovakia Norway USA Poland **USSR** France Germany, F. R. Romania

The member body of the following country expressed disapproval of the document on technical grounds :

Netherlands
