## Paper and board — Determination of smoothness (Bekk method)

**TECHNICAL CORRIGENDUM 1** 

Papier et carton — Détermination du lissé (Méthode Bekk)

RECTIFICATIF TECHNIQUE 1

Technical Corrigendum 1 to International Standard ISO 5627:1995 was prepared by Technical Committee ISO/TC 6, *Paper, board and pulps*, Subcommittee SC 2, *Test methods and quality specifications for paper and board.* 

Page 3, subclause 5.1

Insert the following paragraph after note 1:

If there is a bevel on the inner edge of the glass plate, the inside diameter is measured across the top edge of the bevel and is equal to 11,3 mm  $\pm$  0,05 mm. If no bevel is present on the inner edge, the inside diameter of the glass plate shall be 11,3 mm  $\pm$  0,05 mm, as shown in Figure 2.
