## **Ammonium sulphate for industrial use — Determination of arsenic content — Silver diethyldithiocarbamate photometric method**

*Sulfate d'ammonium à usage industriel — Dosage de l'arsenic — Méthode photométrique au diéthylthiocarbamate d'argent*

First edition — 1978-08-15

UDC 661.522 : 546.19 : 543.42

Ref. No. ISO 5786-1978 (E)

**Descriptors:** ammonium sulphate, chemical analysis, determination of content, arsenic, spectrophotometric analysis, silver diethyldithiocarbamate.

Price based on 2 pages

## FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 5786 was developed by Technical Committee ISO/TC 47, *Chemistry*, and was circulated to the member bodies in February 1977.

It has been approved by the member bodies of the following countries :

Australia	Germany	Romania
Belgium	Hungary	South Africa, Rep. of
Brazil	Israel	Switzerland
Bulgaria	Italy	Turkey
Chile	Mexico	United Kingdom
Czechoslovakia	Netherlands	U.S.S.R.
France	Poland	Yugoslavia

No member body expressed disapproval of the document.
