## **Chlorofluorohydrocarbons for industrial use — Determination of inert gas content — Gas chromatographic method — General principles**

*Hydrocarbures chlorofluorés à usage industriel — Dosage des gaz inertes — Méthode par chromatographie en phase gazeuse —  
Principes généraux*

**First edition — 1982-11-01**

---

**UDC 661.723 : 543.544 : 546.29**

**Ref. No. ISO 5918-1982 (E)**

**Descriptors :** industrial products, halohydrocarbons, fluorochlorinated hydrocarbons, chemical analysis, determination of content, gases, oxygen, nitrogen, argon, methane, carbon monoxide, gas chromatographic analysis.

Price based on 4 pages

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 5918 was developed by Technical Committee ISO/TC 47, *Chemistry*, and was circulated to the member bodies in March 1981.

It has been approved by the member bodies of the following countries :

Austria	Germany, F. R.	Philippines
Belgium	Hungary	Poland
Brazil	India	Portugal
China	Italy	Romania
Czechoslovakia	Korea, Rep. of	Switzerland
Egypt, Arab Rep. of	Mexico	Thailand
France	Netherlands	USSR

The member bodies of the following country expressed disapproval of the document on technical grounds :

United Kingdom
