## International Standard

6783

INTERNATIONAL ORGANIZATION FOR STANDARDIZATION•МЕЖДУНАРОДНАЯ ОРГАНИЗАЦИЯ ПО СТАНДАРТИЗАЦИИ•ORGANISATION INTERNATIONALE DE NORMALISATION

## Coarse aggregates for concrete — Determination of particle density and water absorption — Hydrostatic balance method

Gros granulats pour béton — Détermination de la masse volumique réelle et de l'absorption d'eau — Méthode de la balance hydrostatique

First edition — 1982-06-15

UDC 691,322 : 531,755.2

Ref. No. ISO 6783-1982 (E)

Descriptors: concrete, aggregates, tests, determination, density (mass/volume), water absorption tests, hydrostatic tests.

## **Foreword**

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 6783 was developed by Technical Committee ISO/TC 71, Concrete, reinforced concrete and pre-stressed concrete, and was circulated to the member bodies in January 1980.

It has been approved by the member bodies of the following countries:

Australia	Greece
Austria	India
Brazil	Ireland
Canada	Israel
Chile	Italy
China	Korea,

Denmark

France Germany, F.R.

Egypt, Arab Rep. of

taly Netherlands New Zealand Norway

Korea, Rep. of Poland

Romania

South Africa, Rep. of Spain Sweden Switzerland Thailand USA USSR

The member bodies of the following countries expressed disapproval of the document on technical grounds:

> Belgium Bulgaria Czechoslovakia United Kingdom
