

INTERNATIONAL STANDARD

ISO
9439

Second edition
1999-03-01

Water quality — Evaluation of ultimate aerobic biodegradability of organic compounds in aqueous medium — Carbon dioxide evolution test

Qualité de l'eau — Évaluation de la biodégradabilité aérobie ultime en milieu aqueux des composés organiques — Essai de dégagement de dioxyde de carbone

Reference number
ISO 9439:1999(E)

Contents

1 Scope	1
2 Definitions	1
3 Principle	3
4 Test environment	3
5 Reagents	3
6 Apparatus	4
7 Procedure	5
8 Calculation	7
9 Validity of results	8
10 Test report	9
Annex A (informative) Principle of a test system for measuring carbon dioxide (example)	10
Annex B (informative) Examples of the determination of released carbon dioxide	11
Annex C (informative) Example of a biodegradation curve	13
Annex D (informative) Combined determination of carbon dioxide and DOC	14
Bibliography	17

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 3.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 9439 has been prepared by Technical Committee ISO/TC 147, Water quality, Subcommittee SC 5, *Biological methods*.

This second edition cancels and replaces the first edition (ISO 9439:1990), which has been technically revised.

Annexes A to D of this International Standard are for information only.
