INTERNATIONAL ORGANIZATION FOR STANDARDIZATION • МЕЖДУНАРОДНАЯ ОРГАНИЗАЦИЯ ПО СТАНДАРТИЗАЦИИ • ORGANISATION INTERNATIONALE DE NORMALISATION

## Elastomers — General requirements for dynamic testing

*Élastomères — Spécifications générales pour essais dynamiques*

Second edition — 1981-10-15

UDC 678.074 : 620.1

Ref. No. ISO 2856-1981 (E)

Descriptors : rubber, definitions, tests, testing conditions, test specimens, test equipment, elastic properties.

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 2856 was developed by Technical Committee ISO/TC 45, *Rubber and rubber products*.

The first edition (ISO 2856-1975) had been approved by the member bodies of the following countries :

Australia	Hungary	South Africa, Rep. of
Austria	India	Spain
Belgium	Italy	Sweden
Brazil	Mexico	Switzerland
Canada	Netherlands	Thailand
Czechoslovakia	New Zealand	United Kingdom
Egypt, Arab Rep. of	Poland	USA
France	Portugal	USSR
Germany, F. R.	Romania	

No member body had expressed disapproval of the document.

This second edition, which cancels and replaces ISO 2856-1975, incorporates draft amendment 1, which was circulated to the member bodies in December 1979 and has been approved by the member bodies of the following countries :

Austria	Hungary	Sri Lanka
Belgium	India	Switzerland
Canada	Italy	Thailand
China	Korea, Rep. of	Turkey
Czechoslovakia	Netherlands	United Kingdom
Denmark	Poland	USA
Egypt, Arab Rep. of	Romania	USSR
France	South Africa, Rep. of	
Germany, F. R.	Spain	

The member bodies of the following countries expressed disapproval of the document on technical grounds :

Malaysia  
Sweden

## Contents

	Page
1 Scope and field of application .....	1
2 References .....	1
3 Terms and relationships used to define dynamic properties of elastomers .....	1
4 General information about testing machines .....	3
5 Testing machine requirements .....	3
6 Recommended standard test values .....	4
7 Test pieces .....	4
8 Test piece conditioning .....	6
9 Data .....	7
10 Test report .....	8
<b>Annexes</b>	
A Basic concepts .....	9
B Relations between stress and strain .....	10
C Dynamic properties .....	11
D Dependence of dynamic properties on test conditions .....	12
<b>Bibliography</b> .....	14
