2932

INTERNATIONAL ORGANIZATION FOR STANDARDIZATION • МЕЖДУНАРОДНАЯ ОРГАНИЗАЦИЯ ПО СТАНДАРТИЗАЦИИ • ORGANISATION INTERNATIONALE DE NORMALISATION

● Anodizing of aluminium and its alloys — Assessment of sealing quality by measurement of the loss of mass after immersion in acid solution

Anodisation de l'aluminium et de ses alliages — Contrôle du colmatage par mesurage de la perte de masse après immersion en solution acide

Second edition — 1981-02-15

To be withdrawn

UDC 669.718.915 : 620.1.082.8

Ref. No. ISO 2932-1981 (E)

Descriptors : aluminium, aluminium alloys, surface treatment, anodic coatings, tests, acid resistance tests.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 2932 was developed by Technical Committee ISO/TC 79, *Light metals and their alloys*, and was circulated to the member bodies in April 1978.

It has been approved by the member bodies of the following countries :

Australia	Italy	Sweden
Austria	Japan	Switzerland
Canada	Mexico	Turkey
Czechoslovakia	Norway	United Kingdom
Egypt, Arab Rep. of	Poland	USSR
France	Romania	Yugoslavia
Germany, F.R.	South Africa, Rep. of	
India	Spain	

The member bodies of the following countries expressed disapproval of the document on technical grounds :

Netherlands
USA

This second edition cancels and replaces the first edition (i.e. ISO 2932-1973).
