## Sodium pyrophosphate for industrial use — Estimation of pyrophosphate content — Potentiometric method

Pyrophosphate de sodium à usage industriel — Évaluation de la teneur en pyrophosphate — Méthode potentiométrique

First edition - 1974-12-01

ANSI Internal Doc Sect DEC 1 1 1974

UDC 661.635.2:546.185:543.257.1

Ref. No. ISO 2999-1974 (E)

Descriptors: sodium pyrophosphate, chemical analysis, determination of content, pyrophosphates, potentiometric analysis.

## **FOREWORD**

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 2999 was drawn up by Technical Committee ISO/TC 47, *Chemistry*, and circulated to the Member Bodies in November 1972.

It has been approved by the Member Bodies of the following countries:

Australia India South Africa, Rep. of Austria Ireland Spain Belgium Israel Sweden Czechoslovakia Italy Switzerland Egypt, Arab Rep. of Netherlands Thailand France New Zealand Turkey Germany **Poland** United Kingdom Hungary Romania U.S.S.R.

This International Standard has also been approved by the International Union of Pure and Applied Chemistry (IUPAC).

No Member Body expressed disapproval of the document.
