Ref. No. ISO 3328-1975 (E)

Descriptors: nitric acid, chemical analysis, determination of content, sulphates, volumetric analysis.

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 3328 was drawn up by Technical Committee ISO/TC 47, *Chemistry*, and circulated to the Member Bodies in February 1974.

It has been approved by the Member Bodies of the following countries:

Austria Hungary
Belgium India
Bulgaria Ireland
Chile Israel
Czechoslovakia Italy

Egypt, Arab Rep. of Netherlands France New Zealand

Germany Poland

South Africa, Rep. of

Spain Switzerland Turkey

United Kingdom

U.S.S.R. Yugoslavia

No Member Body expressed disapproval of the document.
