Unplasticized polyvinyl chloride (PVC) pipes – Effect of sulphuric acid – Requirement and test method

Tubes en polychlorure de vinyle (PVC) non plastifié – Action de l'acide sulfurique – Spécification et méthode d'essai

First edition – 1977-02-01

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 3473 was drawn up by Technical Committee ISO/TC 138, *Plastics pipes, fittings and valves for the transport of fluids*, and was circulated to the member bodies in June 1974.

It has been approved by the member bodies of the following countries :

Austria	Israel	Sweden
Belgium	Italy	Switzerland
Chile	Mexico	Thailand
Czechoslovakia	New Zealand	Turkey
Egypt, Arab Rep. of	Norway	United Kingdom
Finland	Poland	U.S.A.
India	Portugal	U.S.S.R.
Ireland	Romania	Yugoslavia

The member bodies of the following countries expressed disapproval of the document on technical grounds :

Germany
Japan
Netherlands
