Ref. No. ISO 4276-1978 (E)

Price based on 3 pages

Descriptors: chemical compounds, ammonia (gas), chemical analysis, determination of content, residues, evaporation analysis, gravimetric analysis.

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 4276 was developed by Technical Committee ISO/TC 47, Chemistry, and was circulated to the member bodies in November 1975.

It has been approved by the member bodies of the following countries:

Austria India
Belgium Israel
Brazil Italy
Chile Mexico
Czechoslovakia New Zeala

New Zealand Poland

France Poland Germany Romania

Germany

Hungary

Switzerland Thailand Turkev

United Kingdom

U.S.S.R. Yugoslavia

South Africa, Rep. of

The member body of the following country expressed disapproval of the document on technical grounds:

Netherlands

This International Standard has also been approved by the International Union of Pure and Applied Chemistry (IUPAC).
