## **Measurement of liquid flow in open channels — Bed material sampling**

### **TECHNICAL CORRIGENDUM 1**

*Mesure de débit des liquides dans les canaux découverts — Échantillonnage des matériaux du lit*

*RECTIFICATIF TECHNIQUE 1*

Technical Corrigendum 1 to International Standard ISO 4364:1997 was prepared by Technical Committee ISO/TC 113, *Hydrometric determinations*, Subcommittee SC 6, *Sediment transport*.

---

*Page iii, Introduction*

In the third line of the third paragraph, replace “particle size finer than 30 µm is cohesive.” with:

“particle size finer than 0,062 5 mm is cohesive, e.g. silt and clays.”

*Page 2, Clause 5*

Replace the third paragraph by the following text:

“For investigations of bed material transport rates, it is recommended that one sample be taken at each vertical of the cross-section where suspended sediment sample is to be taken.”
