
**Acoustics — Statistical distribution of
hearing thresholds of otologically normal
persons in the age range from 18 years
to 25 years under free-field listening
conditions**

*Acoustique — Répartition statistique des niveaux liminaires d'audition
de personnes otologiquement normales âgées de 18 à 25 ans dans des
conditions d'écoute en champ libre*

Contents		Page
Foreword		iv
Introduction		v
1 Scope		1
2 Normative references		1
3 Calculation of percentiles of hearing threshold distribution		2
3.1 General		2
3.2 Threshold distribution at frequencies lower than 10 000 Hz		2
3.3 Threshold distribution at 10 000 Hz and higher frequencies		4
Annex A (informative) Numerical examples to illustrate the procedure		5
Annex B (informative) Selected values of the statistical distribution of hearing thresholds of otologically normal persons in the age range 18 years to 25 years inclusive		6
Annex C (informative) Selected values of z_x		9
Annex D (informative) Notes on the derivation of the statistical distribution of normal hearing thresholds		10
Bibliography		11
