## **National foreword**

This document (EN ISO 4014:2022) has been prepared by Technical Committee ISO/TC 2 “Fasteners” in collaboration with Technical Committee CEN/TC 185 “Fasteners” (Secretariat: BSI, United Kingdom).

The responsible German body involved in its preparation was *DIN-Normenausschuss Mechanische Verbindungselemente* (DIN Standards Committee Fasteners), Working Committee NA 067-00-02 AA “Fasteners with metric external thread”.

The DIN 4000-160-1 tabular layout of product properties applies to hexagon head screws covered in this standard.

The DIN documents corresponding to the documents referred to in this document are as follows:

ISO 225	DIN EN ISO 225
ISO 888	DIN EN ISO 888
ISO 898-1	DIN EN ISO 898-1
ISO 965-1	DIN ISO 965-1
ISO 1891-4	DIN EN ISO 1891-4
ISO 3269	DIN EN ISO 3269
ISO 3506-1	DIN EN ISO 3506-1

## Amendments

This standard differs from DIN EN ISO 4014:2011-06 as follows:

- a) the tables for dimensions have been entirely restructured so that the user can reliably find the specified values (without the risk of selecting the wrong dimension), see Clause 4 and Annex A;
- b) M7 has been included;
- c)  $d_{w,\min}$  has been changed for sizes  $d \leq M5$  from  $s_{\min} - IT16$  to  $s_{\min} - IT15$ , in order to have a larger bearing surface area and thus less contact pressure;
- d) the rules for the shortest and longest standard lengths have been added, and they have been amended accordingly;
- e) for steel bolts, property classes 4.8 and 12.9/12.9 have been added;
- f) for stainless steel bolts, steel grades D4 and D6 and property class 80 have been added;
- g) property class 9.8 and non-ferrous metal bolts have been deleted;
- h) specifications for marking and labelling have been added as Clause 6.
