

INTERNATIONAL
STANDARD

ISO
10780

First edition
1994-11-15

**Stationary source emissions —
Measurement of velocity and volume
flowrate of gas streams in ducts**

*Émissions de sources fixes — Mesurage de la vitesse et du débit-volume
des courants gazeux dans des conduites*

Reference number
ISO 10780:1994(E)

Contents

	Page
1 Scope	1
2 Normative references	1
3 Definitions and symbols	1
4 Principle	1
5 Apparatus	2
6 Environmental requirements	8
7 Test procedure	9
8 Calculation of velocity and volume flowrate	13
9 Accuracy	15
10 Test report	15
 Annexes	
A Maintenance of Pitot tubes	16
B Determination of duct static pressure with Pitot tubes	17
C Determination of flow direction with Pitot tubes	18
D Correction of swirling flow	19

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 10780 was prepared by Technical Committee ISO/TC 146, *Air quality*, Subcommittee SC 1, *Stationary source emissions*.

Annexes A and B form an integral part of this International Standard. Annexes C and D are for information only.
