Ref. No. ISO 1170-1977 (E)

Descriptors : coal, coke, chemical analysis, determination of content, carbon, hydrogen, nitrogen, sulphur, oxygen, chlorine, volatility.

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

Prior to 1972, the results of the work of the technical committees were published as ISO Recommendations; these documents are in the process of being transformed into International Standards. As part of this process, Technical Committee ISO/TC 27, *Solid mineral fuels*, has reviewed ISO Recommendation R 1170-1970 and found it technically suitable for transformation. International Standard ISO 1170 therefore replaces ISO Recommendation R 1170-1970, to which it is technically identical.

ISO Recommendation R 1170 had been approved by the member bodies of the following countries :

Australia	Iran	Spain
Belgium	Israel	Sweden
Canada	Netherlands	Switzerland
Czechoslovakia	New Zealand	Turkey
Denmark	Peru	United Kingdom
Egypt, Arab Rep. of	Poland	U.S.A.
France	Portugal	Yugoslavia
Germany	Romania	
India	South Africa, Rep. of	

No member body had expressed disapproval of the Recommendation.

The member body of the following country disapproved the transformation of the Recommendation into an International Standard :

Czechoslovakia
