Designation: B161 - 05 (Reapproved 2014)

Standard Specification for Nickel Seamless Pipe and Tube¹

This standard is issued under the fixed designation B161; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ε) indicates an editorial change since the last revision or reapproval.

1. Scope

- 1.1 This specification² covers nickel (UNS N02200)³ and low-carbon nickel (UNS N02201)³ in the form of cold-worked seamless pipe and tube in the conditions shown in Table 1 and Table X1.1.
- 1.1.1 Hot-worked material is available. Properties are to be agreed upon between the manufacturer and purchaser.
- 1.2 The values stated in inch-pound units are to be regarded as standard. The values given in parentheses are mathematical conversions to SI units that are provided for information only and are not considered standard.
- 1.3 This standard does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the user of this standard to become familiar with all hazards including those identified in the appropriate Material Safety Data Sheet (MSDS) for this product/material as provided by the manufacturer, to establish appropriate safety and health practices, and determine the applicability of regulatory limitations.

2. Referenced Documents

2.1 ASTM Standards:⁴

B829 Specification for General Requirements for Nickel and Nickel Alloys Seamless Pipe and Tube

3. General Requirement

3.1 Material furnished under this specification shall conform to the applicable requirements of Specification B829 unless otherwise provided herein.

4. Ordering Information

- 4.1 It is the responsibility of the purchaser to specify all requirements that are necessary for the safe and satisfactory performance of material ordered under this specification. Examples of such requirements include, but are not limited to, the following:
 - 4.1.1 Alloy name or UNS number.
 - 4.1.2 ASTM designation and year of issue.
 - 4.1.3 Condition (see Appendix X2).
 - 4.1.4 Finish (see Appendix X2).
 - 4.1.5 Dimensions:
- 4.1.5.1 *Tube*—Specify outside diameter and nominal or minimum wall.
 - 4.1.5.2 *Pipe*—Specify standard pipe size and schedule.
 - 4.1.5.3 *Length*—Cut to length or random.
 - 4.1.6 Quantity—Feet or number of pieces.
- 4.1.7 *Hydrostatic Test or Nondestructive Electric Test*—Specify test (see 6.2).
- 4.1.8 *Hydrostatic Pressure Requirements*—Specify test pressure if other than required by Specification B829.
 - 4.1.9 *Certification*—State if certification is required.
- 4.1.10 Samples for Product (Check) Analysis—State whether samples for product (check) analysis should be furnished (see 5.2).
- 4.1.11 *Purchaser Inspection*—If purchaser wishes to witness tests or inspection of material at place of manufacture, the purchase order must so state indicating which tests or inspections are to be witnessed.
- 4.1.12 Small-Diameter and Light-Wall Tube (Converter Sizes)—See Appendix X1.

5. Chemical Composition

- 5.1 The material shall conform to the composition limits specified in Table 2.
- 5.2 If a product (check) analysis is performed by the purchaser, the material shall conform to the product (check) analysis variations in Specification B829.

6. Mechanical and Other Properties

6.1 *Tension Test*—The material shall conform to the tensile properties specified in Table 1. The sampling and specimen preparation are as covered in Specification B829.

¹ This specification is under the jurisdiction of ASTM Committee B02 on Nonferrous Metals and Alloys and is the direct responsibility of Subcommittee B02.07 on Refined Nickel and Cobalt and Their Alloys.

Current edition approved Oct. 1, 2014. Published October 2014. Originally approved in 1941. Last previous edition approved in 2009 as B161–05 (2009). DOI: 10.1520/B0161-05R14.

 $^{^2\,\}mathrm{For}$ ASME Boiler and Pressure Vessel Code applications see related Specification SB-161 in Section II of that Code.

³ New designation established in accordance with Practice E527 and SAE J1086, Practice for Numbering Metals and Alloys (UNS).
