

Standard Specification for Information Included with Packaging of Multi-Cellular Biological Control Organisms¹

This standard is issued under the fixed designation E 2200; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ϵ) indicates an editorial change since the last revision or reapproval.

1. Scope

1.1 This specification covers package information or information included with packages containing beneficial insects, beneficial mites or beneficial nematodes for biological control of pests, or a combination thereof.

2. Referenced Documents

2.1 Other Standards:

Glenister, C.C. 1996 ANBP Quality Standards. ANBP Bio-Control Matters, Fall 1996:4-5

3. Product Marking

3.1 At the minimum, package information should show:

3.1.1 The scientific name(s) to species of the beneficial species in the package. The author's name automatically references the taxonomic descriptions by the author,

3.1.2 The number of beneficial individuals guaranteed to be obtained from the package,

3.1.3 The reference date,

3.1.4 Additional contents (for example, host material, type of carrier), and

3.1.5 The name of the supplier (producer or distributor) responsible for the integrity of the product.

3.2 Where it is not practical to place information on each

package, the information should be included with the package on a separate sheet of paper.

4. Supplemental Information

4.1 Supplemental information shall be included with the product to convey information essential to its successful understanding and use.

4.1.1 Genus and species, common name, if available,

4.1.2 Family and order,

4.1.3 Life stages shipped,

4.1.4 Preferred host/prey,

4.1.5 Preferred host plant(s)/habitat (optional),

4.1.6 Expected minimum ratio of females to males in package,

4.1.7 Expected developmental periods at a given temperature,

4.1.8 Acceptable environment for maintaining product's health and vigor (for example, acceptable range in temperature and relative humidity,

4.1.9 Statement of impact of pesticides on the product (optional),

4.1.10 Storage recommendations, including an explanation of how the reference date relates to storage, and

4.1.11 Release recommendations.

5. Keywords

5.1 biological control organisms—multi-cellular; labeling; product information; product marking

¹This specification is under the jurisdiction of ASTM Committee E35 on Pesticides and Alternative Control Agents and is the direct responsibility of Subcommittee E35.30 on Natural Multi-Cellular (Metazoan) Biological Control Organisms.

Current edition approved April 10, 2002. Published July 2002.

ASTM International takes no position respecting the validity of any patent rights asserted in connection with any item mentioned in this standard. Users of this standard are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, are entirely their own responsibility.

This standard is subject to revision at any time by the responsible technical committee and must be reviewed every five years and if not revised, either reapproved or withdrawn. Your comments are invited either for revision of this standard or for additional standards and should be addressed to ASTM International Headquarters. Your comments will receive careful consideration at a meeting of the responsible technical committee, which you may attend. If you feel that your comments have not received a fair hearing you should make your views known to the ASTM Committee on Standards, at the address shown below.
