

Australian Standard[®]

**Condition monitoring and diagnostics of
machines—General guidelines**

This Australian Standard® was prepared by Committee ME-087, Machine Condition Monitoring. It was approved on behalf of the Council of Standards Australia on 11 March 2014. This Standard was published on 7 April 2014.

The following are represented on Committee ME-087:

- Asset Institute
 - Australasian Railway Association
 - Australian Industry Group
 - Australian Institute for Non-Destructive Testing
 - Australian Professional Thermography Association
 - Bureau of Steel Manufacturers of Australia
 - Crane Industry Council of Australia
 - Engineers Australia
 - Institute of Electrical Inspectors
 - International Council for Machinery Lubrication
 - Queensland University of Technology
-

This Standard was issued in draft form for comment as DR AS ISO 17359.

Standards Australia wishes to acknowledge the participation of the expert individuals that contributed to the development of this Standard through their representation on the Committee and through the public comment period.

Keeping Standards up-to-date

Australian Standards® are living documents that reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued.

Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments that may have been published since the Standard was published.

Detailed information about Australian Standards, drafts, amendments and new projects can be found by visiting www.standards.org.au

Standards Australia welcomes suggestions for improvements, and encourages readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.org.au, or write to Standards Australia, GPO Box 476, Sydney, NSW 2001.
