Council of Small Business Organisations of Australia
Department of Defence
Department of Social Welfare, New Zealand
Government Communication Security Bureau, New Zealand
Internet Industry Association
National ICT Australia
New Zealand Defence Force
NSW Police Force
Reserve Bank of Australia

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at www.saiglobal.com.au or Standards New Zealand web site at www.standards.co.nz and looking up the relevant Standard in the on-line catalogue.

For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

This Standard was issued in draft form for comment as DR AS/NZS ISO/IEC 27005.

Australian/New Zealand Standard™

**Information technology—Security
techniques—Information security risk
management (ISO/IEC 27005:2011, MOD)**

Originated as HB 231:2000.
Previous edition HB 231:2004.
Jointly revised and redesignated as AS/NZS ISO/IEC 27005:2012.
